SKILLS

Technologies	React.js, Javascript, HTML5, CSS3
Operating Systems	Windows
Tools & IDEs	Visual studio code, PyCharm, and Chrome developer tools

PRACTICAL EXPERIENCE AND PROJECTS

Realtime News Application   – **Personal Project [Team Size: 1]**

- This application fetches real-time news using one of the open source news APIs from Newyork times with help of Javascript features like fetch and promises. This application is similar to Google news. My main motive behind developing this application is to understand and learn how web applications are developed professionally. This application is fully developed in React and React Router.
  Role:
  Fully responsible for developing and deploying the front end of this application, using React.js, HTML5, CSS3, and Javascript.

Neem Tours and Travels   – **Personal Project [Team Size: 1]**

- The project Neem travel has been developed on HTML, CSS.the main objective of developing this project was to create a static website for the travel,from which user can get the complete details of tours and travel ,package,booking such as a about the contact details,images etc.this project is in HTML and CSS so its a static website and does not perform any type of dynamic database operation
